or: (585) 365-8870 (not collect)

Another year is gone (already? Where did it go?) and we're into another one that will probably fly by just as quickly. I can confirm that time passes faster as you get older, but I still can't explain the phenomenon. Hope your holidays were merry and filled with good tidings. And you might start planning the antenna/Ground improvements you want to do next summer.

Please remember to send your contributions to the correct editor for inclusion in the newsletter. Your logs go to Leezo, your reports of QSLs received come to me, your antenna questions should go to Chris, and any info or questions on clandestines go to Vince. Sending everything to Lee adds to his already huge workload and slows things down; besides, if you're using email it's really no extra effort to send reports to the correct person.

Also, please check your mailing label for your expiration date. Following your name you'll see a four-digit number, which is the year and the month. If yours reads 0501, this is your last paid issue. If it reads 0502, you'll get one more. If it reads 0411, shame on you!

Onward..!

### Format of a log entry:

Date Heard / Time Heard (in UTC) / Frequency (in kHz) / Mode / Details of Transmission

### Modes:

A = AM F = FM L = Lower Sideband U = Upper Sideband

### Reporting a signal's quality:

The simplest way of doing this is to judge the signal as being "Poor", "Fair" or "Good" and reporting it as such.

If you're one of them highfalutin' types with radios that are smarter'n your dawg, you probably use the SIO system

S = Signal (strength) I = Interference O = Overall (quality)

- S, I and O are all rated between 0 and 5, 0 being worst, 5 being best. (As I recall, there were written tables for these values but I haven't seen one in a very long time. If you have the details somewhere, send 'em along to me!)

### MAIL DROPS

These are the relevant – for this month – addresses to which you should send your reports as appropriate (along with at least three first class stamps to handle mailing costs) if you’re doing things by snail mail or if the station doesn’t use email.

Don’t forget that foreign drops need IRCs or dollar bills instead of US postage stamps.

Semi-foreign drops (read: Canadians) need cash or IRCs but might accept cowry shells, beads or small hand mirrors. Poutine is an accepted medium of exchange only within the province of Quebec.

Of course, if you really want to cover all the bases – get with it and spend the vast sum of \$49 bucks (after rebate) for a Web TV box – as time goes by, more and more of the QSL business is being transacted via email.

Addendum – Evil Bill and Micro\$oft have renamed the service to “MSN TV” and revamped it somewhat. The box itself is now called “MSN Web TV 2” and has been completely redone, too. It’ll now handle streamed audio in the MS Media Player format, photographs, instant messaging is improved, etc. Again, if you’re tired of sitting by candlelight scratching your words on parchment with a goose quill and listening to the cat’s-whisker radio whilst cursing these new-fangled inventions, go take a look. This is a way for even the worst Luddites to get on the Internet.

## TEN (and TWENTY) YEARS AFTER...

January 1985 ACE was 20 pages with a story of the KPF941 bust and a Ralph Martinez drawing about it on the cover. DiaLogs was 9 pages including 2 NAM SW, 22 NAM SW, 8 clandestines, and 25 unIDs from at least 26 reporters.

January 1995 ACE was 24 pages with Up Against The Wall Radio QSL #50 on the cover. DiaLogs was 9 pages featuring 2 NAM MW, 40 NAM SW, 4 Euros, 1 clandestine, and 6 unIDs from about 24 contributors.

## RAMBLINGS

Well, this edition of DiaLogs marks the beginning of my fifth year of editing and writing this column. My, how time flies! Older, grayer and a little wiser, I guess.

Bill Hvozda checks in, ditto Rudy Elsen. Bill would really like a QSL from JB, so, JB, if you're reading this – howsabout a QSL for Bill?

Nice turnout this month – a total of ten reporters. Thanks guys – we (obviously) couldn't do it without you!

Nice catch of KRAP by Rudy. Notes that 27555 seems to be the haunt of the more creative freebanders. Rudy asks if Alan Maxwell's still around or is it just relays now? Anyone know for sure?

Left the late reports of The Hour of Slack and Crooked Man in 'cause they're unusual and the newer listeners might find them of interest.

Been playing with that WiNRADiO G303e that I mentioned in the last column. That's one nice little radio – kind of like the Ten-Tec RX-320 on huge doses of steroids. It's a really sweet radio that you can take out with ya to go listening in the field! I figure the guys at WiNRADiO probably sold their souls to Satan 'cause so far they ain't made a single misstep with each development in their HF radio product line.

Yours truly is still searching for a job – well, I do have one to start but it's nothing I want to talk about, shall we say? I'm still looking for a real job back in computers (not because I love high tech any longer but because it's the only field where I can earn enough so as not to have to live in a cardboard box – thanks, Dubya!) and I've been interviewing with the IT departments of a couple of ski areas in northern NH/ME. Those are nice areas and the pay ain't bad, either – let's hope! It'd be nice not to be an unemployed, penniless bum once again...

Don't forget to listen over Christmas, folks – we should get a few stations on over that period – and New Year's, of course. I hope to be out with the G303e and testing a bit more then.

Okay, Merry Christmas, all. (Screw Politically Correct "Happy Holidays"!) Eat, drink, and have a good time, all of ya!

## PROPAGATION

### What it be:

Okay, just like the sea, radio waves below a certain frequency display tide-like behavior that is dependent upon the time of day at your location and at the target location. (Arrr, me hearties – 'tis a most appropriate metaphor!) Listen for a given area at one time and you'll hear nothing. Listen, say, twelve hours later and you'll hear find you're looking for. That's a real simple description of a very complex subject.

The tables below can be looked upon as being like tide charts for a certain part of the world and a certain frequency. The higher the "tide" displayed, the better the radio path between the two points on the chart at that time on that frequency.

To try to provide useful propagation for the ACE readership I cover the most common Pirate frequencies month by month and I produce tables that roughly divide the USA into eastern, central and western sections and the propagation paths between them.

If you live, say, in Boston and want to try to listen for KMUD out in the western part of the country, you would check the table that says "Philadelphia, PA to Los Angeles, CA". This chart shows the radio "tides" between the two points that approximate where you are and where KMUD might be. Now look at the height of the bars – between 0200 and 0900 (that's UTC) looks to offer the best east-west listening path for you. Likewise, 1600-2100 might not be the best time to listen.

*Caveat: These charts are rough guides only – radio propagation is even stranger than a Republican Senator who believes that poor folk need a break more than the obscenely wealthy do – you sometimes hear the darnedest things come out of nowhere when you least expect it. Use them as a guide but don't let it stop you listening for a target when it says propagation is at its poorest – just use them as indicators of "best chances"!*

If you want to do more serious reading about propagation the book "The New Shortwave Propagation Handbook" is a pretty good read on the subject and even us po' folks who can't afford RX-340s can understand it!

Note: Amsterdam charts are for 6.25MHz, NOT 6.92MHz as the titles say.

gnuz and gnotes...

No gnuz of gnote this month. Hope you all had a great holiday season and got that new receiver (or transceiver) you wanted.

under the door...  
the QSL report

Congrats go out to Bill Hvozda who received his first ever pirate QSL – a card, letter, and CD of the show from Ragnar Radio in an unspecified length of time. [Good way to start, Bill! jta]

Brian Locke snagged a QSL with infosheet and CD from Undercover Radio, and a QSL sheet and bumpersticker from WAZU.

Woody Smith reports two different eQSLs from WHGW, each in a few hours of his reports.

George Zeller is pleased as the Dickens over a "Ghost of Xmas Past" sheet (#22) from WHGW.

# the ASSOCIATION of CLANDESTINE radio ENTHUSIASTS

PO Box 1, Belfast, New York 14711-0001

The A\*C\*E is an association of individuals who find pirate, clandestine and covert communications an interesting part of their radio listening hobby. The primary existence of the club revolves around the publication of a monthly bulletin, The A\*C\*E. The bulletin reports on pirate, clandestine, covert and other unexplained broadcasts. Also, the readers are provided with other available material concerning motives, explanations and the theories behind these various broadcasts and broadcasters. The ACE as an organization, does not encourage, support or condone any illegal activity; we simply seek to understand the nature and reasoning behind such broadcasts. If your interests include listening to pirate radio stations, clandestine broadcasts and covert communications, The A\*C\*E is for you!!

All subscriptions, renewals, and queries regarding subscriptions should be sent to the above club address. Contributions for each editor should be sent to their own given addresses.
